perspective via the single aspect of wine most compelling to food lovers: flavor. At the heart of this indispensable reference, formatted like the authors' two previous bestsellers *The Flavor Bible* and *What to Drink with What You Eat*, is an encyclopedic A-to-Z guide profiling hundreds of different wines by their essential characteristics—from body and intensity to distinguishing flavors, from suggested serving temperatures and ideal food pairings to recommended producers (including many iconic examples). The book provides illuminating insights from dozens of America's best sommeliers via informative sidebars, charts and boxes, which complement the book's gorgeous four-color photography. Another groundbreaking work from two of the ultimate culinary insiders, this instant classic is the perfect gift book.!--EndFragment--

If you read wine reviews, you're already either amused or confused by the soaring language wine writers often use to describe what they're smelling and tasting. But do you always know what they mean? Have you ever sipped a complex white and sensed what's so colorfully described as a peacock's tail? Have you ever savored a full-bodied red only to detect the ripe acrid smell of a horse stall? If not, you're in for a treat, because these terms and thousands more are all here to amuse, dismay, enlighten, inspire, puzzle, and utterly shock you . Welcome to the rich linguistic universe of wine speak: a world where words and wine intersect in an uncontrolled riot of language guaranteed to keep you entertained for hours. The author, a lifelong lover of both wine and words, has compiled and organized this unique thesaurus of 36,975 wine tasting descriptors into 20 special collections extracted from 27 categories so you can locate exactly the right

Or, much more cautiously, with wines that could introduce you to angel pee, citronella, eastern European fruit soup, Godzilla, iodine, ladies' underwear, mustard gas, old running shoes, rawhide, hot tar roads, bubblegum, sweaty saddles, crushed ants, kitchen drains, or even turpentine.

Includes food and wine, beer and spirits pairings and how different food flavours and beverages interact. Starting with a look at how wines are made, how to taste wine and how wines interact with food, the different types of grapes, where they are grown, and the types of wines that are made with them.
