The General Electric CF6, US military designation F103, is a family of high-bypass turbofan engines produced by GE Aviation. Based on the TF39, the first high-power high-bypass jet engine, the CF6 powers a wide variety of civilian airliners. The basic engine core also powers the LM2500, LM5000, and LM6000 marine and power generation turboshafts.

General Electric CF6 - Wikipedia

The CF6-80A and -80C2 engines are known for their high reliability, and this was evident during extended twin operations (ETOPS) testing.

The CF6 Engine | GE Aviation

CF6-80A Engine Designed for short-to-medium range commercial jets, the CF6-80A has been in service since the late 1970s. Delta TechOps has serviced these engines since 1982.
