The Picts is a survey of the historical and cultural developments in northern Britain between AD 300 and AD 900. Discarding the popular view of the Picts as savages, they are revealed to have been politically successful and culturally adaptive members of the medieval European world. Re-interprets our definition of ' Pict ' and provides a vivid depiction of their political and military organization Offers an up-to-date overview of Pictish life within the environment of northern Britain Explains how art such as the ' symbol stones ' are historical records as well as evidence of creative inspiration. Draws on a range of transnational and comparative scholarship to place the Picts in their European context

Scope: theology, philosophy, ethics of various religions and ethical systems and relevant portions of anthropology, mythology, folklore, biology, psychology, economics and sociology.

This book looks at the evolution of rural settlement in Scotland from the Mesolithic period through to the improving movement of the 18th and 19th centuries. The main emphasis is on changes in society and technology, but the book also considers how the development of the physical landscape laid the foundation for such changes. The author strikes a balance between general perspectives (including relevant contextual materials such as the political structures) and local studies, with much emphasis on individual sites. Lack of documentation prior to the 10th century places particular importance on the archaeological evidence, but imaginative interpretation of this evidence has led to a major re-evaluation. Ideas emphasizing continuity of settlement and local adaptation are replacing older 'invasionist' theories emphasizing Celtic war lords and broch-building pirates.

For the Romans, Britannia lay beyond the comfortable confines of the Mediterranean world around which classical civilisation had flourished. Britannia was felt to be at the outermost edge of the world itself, lending the island an air of dangerous mystique. To the soldiers crossing the Oceanus Britannicus in the late summer of AD 43, the prospect of invading an island believed to be on its periphery must have meant a mixture of panic and promise. These men were part of a formidable army of four veteran legions (II Augusta, VIII Hispana, XIII Gemina, XX Valeria), which had been assembled under the overall command of Aulus

Plautius Silvanus. Under him were, significantly, first-rate legionary commanders, including the future emperor Titus Flavius Vespasianus. With the auxiliary units, the total invasion force probably mounted to around 40,000 men, but having assembled at Gessoriacum (Boulogne) they refused to embark. Eventually, the mutinous atmosphere was dispelled, and the invasion fleet sailed in three contingents. So, ninety-seven years after Caius Iulius Caesar, the Roman army landed in south-eastern Britannia. After a brisk summer campaign, a province was established behind a frontier zone running from what is now Lyme Bay on the Dorset coast to the Humber estuary. Though the territory overrun during the first campaign season was undoubtedly small, it laid the foundations for the Roman conquest which would soon begin to sweep across Britannia. In this highly illustrated and detailed title, Nic Fields tells the full story of the invasion which established the Romans in Britain, explaining how and why the initial Claudian invasion succeeded and what this meant for the future of Britain.

First mentioned by name in AD 297, the Picts inhabited Northern Britain from the end of the 3rd century AD to the 9th. They rose to power in the devastation following Emperor Septimus Severus's repression of the Caledonians in AD 208, and dominated Northern Britain for over 500 years, before vanishing mysteriously. The Picts represent a high point of Celtic civilisation, remaining free and unconquered beyond the borders of the Roman world, and rising to become the first barbarians to form a recognisable 'nation'. This title takes a detailed look at their origins, and examines Pictish heroic and warrior society, covering education and training, appearance and equipment, the status of women, and the experience of battle.
