Here are five
emerging
security
technologies
that may be able
to do that. 1.
Hardware
authentication.
The inadequacies

Online Library Software

of usernames and passwords are well known.

Clearly, a more secure form of authentication is needed. One method is to bake authentication into a user's hardware. Intel is moving in that direction

Online Library Software

with the
Authenticate
solution in its
new, sixth-
generation Core
vPro processor.

~~TechnologyAdvice~~

Bitdefender is a
Romanian
cybersecurity
and anti-virus
software

company. It was
founded in 2001
by Florin Talpeș,
who is currently

Online Library Software

the chief
executive
officer.

Bitdefender
develops and
sells anti-virus
software,
internet
security
software,
endpoint
security
software, and
other

Online Library Software

cybersecurity
products and
services.. In
2018, the
software had
about 500
million users
worldwide.

~~Bitdefender~~

~~Wikipedia~~

Tech Republic
also highlighted
the risk of

Online Library Software

greater networks consisting of tens of billions of more devices and new software vulnerabilities.

No one organization can address those security risks alone. Given the potential impact that 5G could have national

Online Library Software

economies,
governments need
to take the lead
in developing 5G
mobile security
standards.
