Abstract Herbert Callen
was a theoretical
physicist who
contributed to the field
of statistical mechanics.

He also wrote a
textbook on

Online Library T hermodynamics

thermodynamics and
taught at University of
Pennsylvania. Other
institutional affiliations
include Temple
University and
Massachusetts Institute
of Technology.

Callen, Herbert B.
Herbert Bernard Callen
(July 1, 1919 – May 22,
1993) was an American
physicist specializing in

Online Library T hermodynamics

thermodynamics and
statistical mechanics. [1]

He is considered one of
the founders of the
modern theory of
irreversible

thermodynamics, [2]
and is the author of the
classic textbook

Thermodynamics and
An Introduction to
Thermostatistics ,
published in two
editions. [3]

Callen, Herbert B. -

Amazon.ae

Herbert B. Callen The first edition of this text established a new conceptual structure for thermodynamics. This now classical structure is maintained in the present edition which includes a simple descriptive account of recent advances in critical phenomena and

Online Library T hermodynamics

a fully compatible but
logically distinct
introduction to statistical
mechanics.

Thermodynamics and
an Introduction to
Thermostatistics ...
Thermodynamics,
science of the
relationship between
heat, work, temperature,
and energy.

Thermodynamics deals

Online Library Thermodynamics

with the transfer of energy from one place to another and from one form to another. The key concept is that heat is a form of energy corresponding to a definite amount of mechanical work.
