Zero. Zip. Zilch. Nada. That's what all the other numbers think of Zero. He doesn't add anything in addition. He's of no use in division. And don't even ask what he does in multiplication. (Hint: Poof!) But Zero knows he's worth a lot, and when the other numbers get into trouble, he swoops in to prove that his talents are innumerable.

Zero, zip, nada, zilch. It's all too easy to ignore the fascinating possibilities of emptiness and non-existence, and we may well wonder what there is to say about nothing. But scientists have known for centuries that nothing is the key to understanding absolutely everything, from why particles have mass to the expansion of the universe; without nothing we'd be precisely nowhere. With chapters by 22 science writers, including top names such as Ian Stewart, Marcus Chown, Helen Pilcher, Nigel Henbest, Michael Brooks, Linda Geddes, Paul Davies, Jo Marchant and David Fisher, this fascinating and intriguing book revels in a subject that has tantalised the finest minds for centuries, and shows there's more to nothing than meets the eye.

Ideal for not-for-profit organisations but just as useful for start-ups and any business today looking to get more bang for their pound/euro/buck, Zilch features plenty of real-life stories and strategies for success. As well as offering advice on how

Follow up to the award winning book, "ONE", a number called ZERO wonders, "How does a number worth nothing become something?" The story of ZERO's search to find value in herself and in others

Topics covering: - Body Issues & appearance - Finding value in yourself and developing character - Working with others/Teamwork/Developing social skills - Counting/Math - Courage

Zero is a big round number. When she looks at herself, she just sees a hole right in her center. Every day she watches the other numbers line up to count: "1, 2, 3, 4, 5, 6, 7 . . . !" "Those numbers have value. That's why they count," she thinks. But how could a number worth nothing become something? Zero feels empty inside. She watches One having fun with the other numbers. One has bold strokes and squared corners. Zero is big and round with no corners at all. "If I were like One, then I can count too," she thinks. So she pushes and pulls, stretches and straightens, forces and flattens herself, but in the end she realizes that she can only be Zero. As budding young readers learn about numbers and counting, they are also introduced to accepting different body types, developing social skills and character, and learning what it means to find value in yourself and in others.
